STANDARD EQUIPMENT

Shape fully optimized to ensure easy and precise handling, with a design that prevents the collection of unwanted material and allows the wood to slide smoothly inside the jaws.

Hydraulic cylinder with large bore and integrated lock valve for a powerful and secure grip, preventing accidental opening and ensuring greater operational safety

High-quality steel structure, resistant to deformation and wear, with reinforced IMEX700 jaws designed to withstand the most demanding stresses

Honeycomb bushings with lubrication points for smooth operation and reduced wear over time.

High-quality coating for greater resistance to impacts and wear

Hydraulic hoses with anti-burst sleeve L=1500

Provision for interchangeable machine mount, ensuring versatile compatibility with various mini loaders and skid steer loaders

300° rotation with an adjustable locking system, allowing the grapple to adapt to any operational requirement. The locking system, which can be released via a practical lever, ensures maximum versatility and precision in every operation. (A)
