LAVICOLE: Feeders cleaning mode

Rabaud advantages

- Reduces arduousness, the operator is not obliged to hold the watering spray gun at arm's length.
- Machine mounted on tracks entirely radiocontrolled by the operator.
- 4 washing devices enable a complete quality washing of the building :
  - Swiveling rail mounted on an articulated arm which can reach a 5 m height for the ceiling and walls cleaning.
  - Clean-up tunnel for climbing protection systems and feeders.
  - Manually operated high-pressure lance for the finishing.
  - Foam gun (optional) to apply the detergent.
- A high pressure pack stands outside. It includes a 1000 L buffer tank with a 140 bar output pressure and a 87 L/min. flow.
- For a 1000 m^2 building, it takes about 3 hours washing, depending on the building's structure and the required surface finish.
