NEXOLINK

The NexoLink multifunction front auger for mini skid loaders, skid loaders and wheel loaders transforms the carrier machine into a versatile platform for multiple operations.

Compact and robust, it is designed to use various attachments such as drilling bits, log splitters, concrete mixers, rotary harrows and stump grinders. Practical and versatile, it expands operational possibilities and is ideal for applications in agriculture, forestry, construction and green maintenance.

STANDARD EQUIPMENT

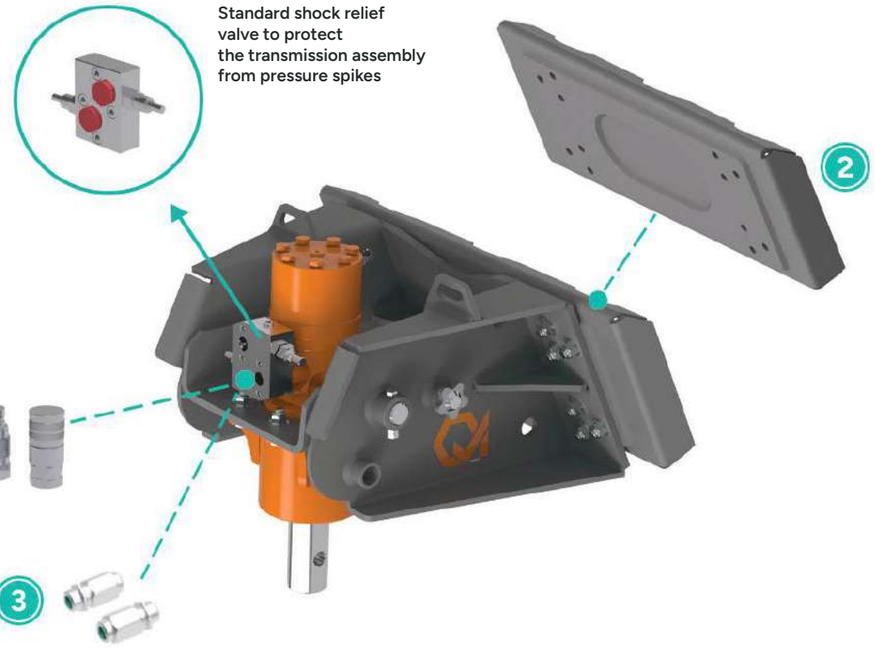

- NL 1S – NL 2S oscillation: pivot joint of the rotating body with the possibility of being locked in different positions or left free in pendulum mode to naturally adapt to the ground
- NL 2S oscillation: in addition to the 1S joint, the 2S version is equipped with a second joint that allows the drilling tip to remain perpendicular to the ground even on sloped surfaces
- Hexagonal drive shaft for quick tool replacement
- High-quality coating for greater resistance to impacts and wear
- Provision for interchangeable machine mount, ensuring versatile compatibility with various mini loaders and skid steer loaders
- Heavy-duty interface support between gearbox and tools, resistant to high radial loads
- Standard shock relief valve to protect the hydraulic motor from pressure spikes
- Hydraulic hoses L=2000
